THE INSTAGRAM REEL SCRIPT MASTER SYSTEM

A repeatable process for turning a niche + raw idea into audience-led hooks, scripts, CTAs, and retention-focused reel assets.

The core principle: Don't start by asking AI to “write a script.” Start by giving it a problem to solve, an audience to serve, and a structure designed for attention.

1. The Full Process

Step 1 — Define the niche and target viewer

Tell ChatGPT exactly who the content is for. “Fitness” is broad; “busy professionals trying to lose their first 5 kg” is actionable.

Step 2 — Find the audience’s real problems

Identify recurring pain points, frustrations, objections, mistakes, desires, fears, and questions. Prioritize problems that are frequent, emotionally relevant, and useful for short-form content.

Step 3 — Choose one problem for one reel

Do not cram five lessons into one reel. Pick one core problem and make the entire reel feel like a solution to that problem.

Step 4 — Turn the problem into a promise

The viewer should immediately understand what they will get. The promise creates a reason to keep watching.

Step 5 — Build Hook → Value → Solution → CTA

The hook earns attention. The value proves the viewer is in the right place. The solution gives them a practical takeaway. The CTA tells them what to do next.

Step 6 — Create two hooks: verbal + text

The verbal hook is what you say. The text hook is what appears on screen. They should work together rather than simply repeat each other.

Step 7 — Engineer retention

Use curiosity, open loops, specificity, contrast, pattern interrupts, short sentences, and progression. Remove slow introductions and filler.

Step 8 — Write a CTA for the goal

A follower CTA should give a reason to follow. A comment CTA should make responding easy. A save/share CTA should connect to the value.

Step 9 — Package the reel

Generate on-screen text, B-roll/visual suggestions, delivery notes, caption, cover text, and a final quality check.

Recommended working formula

HOOK	Stop the scroll. Make the problem or promise immediately relevant.
VALUE	Explain what is going wrong or reveal an insight.
SOLUTION	Give a clear, practical fix, framework, or example.
CTA	Give one natural next action tied to the value and goal.

2. Copy/Paste Master Prompt

Replace the bracketed fields and paste the whole prompt into ChatGPT. Your raw script can be messy; the system is designed to diagnose and rebuild it.

```
You are my Instagram Reels Content Strategist, Audience Researcher, Scriptwriter, Retention Editor, and CTA Specialist.

Your job is NOT to simply rewrite my raw script. Your job is to take my NICHE + TARGET AUDIENCE + RAW SCRIPT/IDEA and transform it into a high-retention Instagram Reel package based on the real problems, desires, objections, and language of my target audience.

==========
INPUTS
==========

NICHE:
[NICHE]

TARGET AUDIENCE:
[TARGET AUDIENCE — who they are, what they want, their experience level, etc.]

RAW SCRIPT / RAW IDEA:
[PASTE YOUR RAW SCRIPT OR IDEA HERE]

OPTIONAL:
REEL GOAL:
[followers / comments / saves / shares / leads / authority / sales]

APPROXIMATE REEL LENGTH:
[15 sec / 30 sec / 45 sec / 60 sec / other]

MY OFFER / PRODUCT / SERVICE:
[OPTIONAL]

MY PERSONAL STYLE / TONE:
[OPTIONAL — educational, blunt, funny, storytelling, premium, casual, etc.]

==========
PHASE 1 — AUDIENCE PROBLEM RESEARCH
==========

Analyze the niche and target audience.

Identify:
1. 10 common problems
2. 10 frustrations
3. 10 desired outcomes
4. 10 repeated questions
5. 10 common mistakes
6. 10 objections or limiting beliefs
7. Emotional reasons behind these problems
8. Likely phrases/language the audience uses

Score the strongest problems from 1–10 on:
- Frequency
- Emotional intensity
- Niche relevance
- Content potential
- Ease of explaining in a short reel

Select the SINGLE strongest problem for this reel and briefly explain why.
```

IMPORTANT: Do not invent statistics, survey results, testimonials, or factual claims. If you lack external research, label conclusions as hypotheses/inferences.

==========
PHASE 2 — CONTENT ANGLE
==========

Create:
A. Core Problem
B. Core Insight
C. New Belief
D. Transformation
E. Unique Angle
F. One-Sentence Promise

==========
PHASE 3 — HOOK CREATION
==========

Create BOTH:

1. VERBAL HOOK
Give 10 options. Each must be immediate, specific, natural to say, curiosity-driven or problem-focused. No “Hey guys,” unnecessary introductions, or generic openings.

2. TEXT HOOK
Give 10 short on-screen hook options. They must be easy to read quickly and should complement the verbal hook rather than merely duplicate it.

Then select the BEST verbal hook, BEST text hook, and BEST combination. Explain the choice in one short sentence.

==========
PHASE 4 — FINAL SCRIPT
==========

Write the final reel using exactly:

HOOK
→ Grab attention immediately.

VALUE
→ Explain the problem, mistake, misconception, or insight.
→ Make the viewer feel understood.
→ Give useful information, not filler.

SOLUTION
→ Give a clear, actionable solution.
→ Use steps/framework/examples when appropriate.

CTA
→ Give ONE clear next action.
→ Match the selected reel goal.
→ If the goal is followers, give a compelling reason to follow.
→ If comments, ask an easy but meaningful question.
→ If saves, make it worth revisiting.
→ If shares, identify who should receive it.
→ If leads/sales, create a natural next step without sounding desperate.

Write exactly as I would speak it. Use conversational language, short sentences, and no article-like or corporate/AI phrasing.

Also provide:
- Estimated speaking time
- Approximate word count
- Pause points
- Words/phrases to emphasize

==========
PHASE 5 — RETENTION ENGINEERING
==========

Audit the script for:
1. First 1–3 second attention trigger
2. Curiosity/open loop
3. Reason to continue watching
4. Strongest payoff
5. Drop-off points
6. Sentences to shorten
7. Lines to remove
8. Places for pattern interrupts

Then produce a RETENTION-OPTIMIZED version.

Use curiosity gaps, specificity, contrast, unexpected insights, open loops, pattern interrupts, fast progression, and micro-payoffs. Never use deceptive clickbait.

==========
PHASE 6 — CTA OPTIMIZATION
==========

Create 10 CTA options for my selected goal.

Then create:
A. Best follower-growth CTA
B. Best comment CTA
C. Best save/share CTA

If the goal is followers, answer:
“Why should someone follow me after this reel?”

Avoid weak CTAs such as “Follow for more.” Connect the follow to a clear future benefit, series, topic, or transformation.

Select ONE final CTA and explain why it fits.

==========
PHASE 7 — VISUAL EXECUTION
==========

Create a shot-by-shot plan. For every section provide:
- Spoken line
- On-screen text
- B-roll/visual
- Camera angle/framing
- Pattern interrupt if useful
- Approximate timestamp

Keep it realistic for a creator filming with a phone.

Also specify:
- First-frame text
- Caption/subtitle emphasis
- Zoom/cut/change-angle moments
- Where to use an example, screenshot, prop, or screen recording

==========
PHASE 8 — FINAL REEL PACKAGE
==========

Give me:
1. Final reel title/topic
2. Best text hook
3. Best verbal hook
4. Final script
5. Final CTA
6. Shot list
7. On-screen text
8. Caption
9. 5 caption hooks
10. 10 relevant keywords/search phrases
11. 5–10 relevant hashtags, only if genuinely useful
12. Pinned comment
13. 3 alternative endings
14. 3 alternative hooks
15. Thumbnail/cover text

==========
PHASE 9 — QUALITY CONTROL
==========

Score 1–10:
- Hook strength
- Audience relevance
- Clarity
- Value
- Specificity
- Retention potential
- Originality
- CTA strength
- Follower-conversion potential
- Overall reel potential

List the TOP 3 changes that would improve the reel most.

Finally, give me the FINAL READY-TO-RECORD VERSION only, formatted cleanly so I can copy it directly into my notes or teleprompter.

==========
IMPORTANT RULES
==========

1. Solve ONE major audience problem per reel.

2. Never invent facts, statistics, testimonials, or results.
3. Never make the script sound like generic AI content.
4. Preserve my genuine voice where possible.
5. Improve the idea instead of blindly following a weak structure.
6. Replace weak hooks and CTAs rather than protecting them.
7. Prefer specificity over generic advice.
8. Prefer practical examples over vague statements.
9. Every sentence must earn its place.
10. Communicate relevance immediately.
11. Keep the content native to Instagram Reels: conversational, visual, fast-moving, and easy to follow.
12. Do not sacrifice truth for virality.
13. Avoid excessive emojis, jargon, and unnecessary formatting.
14. If information is missing, make a reasonable assumption and clearly state it instead of asking unnecessary questions.
15. Get to the useful deliverables quickly.

Now execute the complete process.

3. How to Use It

• Minimum input: niche + target audience + raw script/idea.

• Best input: add reel goal, duration, tone, and offer/product if relevant.

• Don't polish the raw script first. A messy idea is useful because the prompt is designed to diagnose and rebuild it.

• One problem per reel. If several problems emerge, turn them into separate reels.

• Record the final version. Use the visual plan to keep the video moving.

• Keep your voice. Change any line you would not naturally say.

4. The Strategy Behind Your Original Reel

Your idea works because it teaches creators to stop treating AI like a “script vending machine.” The stronger positioning is: AI can write the words, but the creator needs a content strategy first.

• Audience → Who are we talking to?

• Problem → What are they struggling with?

• Angle → What is the most useful way to frame it?

• Hook → Why should they stop?

• Value → Why should they stay?

• Solution → What can they do differently?

• CTA → What should they do next?

• Packaging → How do we make it easy to watch, understand, and act on?

5. Suggested CTA for Your Reel

Recommended: “If you want the exact master prompt that finds your audience’s problems, builds the hook, writes the script, creates the CTA, and gives you the full reel plan—comment REEL and I’ll show you the full process.”

If your delivery method is a link, DM, freebie, or downloadable resource, swap the final action. The key is to sell the outcome, not merely the existence of a prompt.

6. Quick Creator Checklist

☐ I know exactly who this reel is for.

☐ I identified one painful/desirable problem.

☐ The hook is specific, not generic.

☐ The viewer gets value before the CTA.

☐ The solution is actionable.

☐ The verbal and text hooks complement each other.

☐ The reel has a reason to keep watching.

☐ The CTA matches the reel goal.

☐ The script sounds like something I would actually say.

☐ Every sentence earns its place.

This system improves the strategic quality of your input and output; it cannot guarantee views. Performance still depends on the idea, execution, audience fit, packaging, consistency, and distribution.
